

MMC Dent: software for archiving, management and analysis of dental images and files

Main features:

- Store as many images, video files and files of any type and format as you need! Restricted only by your hard disk capacity. All the required files can be placed to one record with unlimited number of fields with text information about patient (medical history).
- Import images from any digital devices which are equipped with TWAIN or DirectShow directly to active database record.
- Smart import from disc allows automatic separation of files by time and place.
- Importing new files to record is as easy as drag-and-dropping to the thumbnail bar.
- Retrieve your patient data using all the text you have entered to record fields. Filtering by any number and combination of keywords.
- Most important image processing operations like cropping, resizing, image brightness, contrast and color adjustment, rotation and flip, image enhancement.
- Spec. routines for orthodontics:
Cephalometry
SNA, SNB, ANB, SN-SNAPNS, AiAr-NS, BiBr-OrPo, AiBiMp-ML, I-SN, I-ML, AiAr-BiBr, Go, NSL-NL, NSL-ML, Y-axis, NL-ML, SN-GoGn, ANSPNS-GoGn, AiAr-ANSPNS, AiAr-SN, BiBr-GoGn, wits, SN, A-ANSPNS, ANS-PNS, Go-Gn, R1-R2, R1R2/GnGo, NSAr, SArGo, ArGoMe, SGo/NMe, BaN-SMe
Profilometry
Kn prn Kspm, Kn sn Kspm, prn sn ls, ls Kspm Kpg
- Free measurement feature to analyze any images using calibrated angular and linear measurements in real units.
- Shortcut to your favorite image processing software with direct update in the database.
- Access your database over local network.
- Print out attractive reports for your patients.
